EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John R. Moses on May 12, 2010.

The application has been amended as follows:

Claims 1-5 and 11-16 have been cancelled.

Claim 6 A method of treating age-related macular degeneration without using an external photosensitizer, the method comprising selecting a laser light source that enables a non-thermal therapeutic laser light beam to be emitted in a manner similar to laser light sources used for dynamic therapy, said light source being designed to emit a therapeutic laser light beam, presenting an emission wavelength lying in the range 1.26 μm to 1.27 μm at a power in the range of 1mW to 1W and illuminating the macula of the patient with said laser light beam to generate in the retina intracellular singlet oxygen directly and in sufficient quantity to occlude abnormal retinal vessels.

2. The following is an examiner's statement of reasons for allowance: The prior art neither teaches nor suggests a method for treating macular degeneration without using

an external photosensitizer by applying light with a wavelength in the range of 1.26 μm to 1.27 μm in order to directly generate singlet oxygen in the retina.

3. US 2002/0173832 to Strong discloses a method for treating macular degeneration by generating singlet oxygen, but the reference uses a photosensitizer and a wavelength that activates this photosensitizer generally between about 550 and 695 nm to accomplish this result.
4. US 2003/0093065 to Peyman also teaches a method of treating age-related macular degeneration, but again uses a photosensitizer and a wavelength of about 630 nm or 670 nm to activate the photosensitizer.
5. US 2003/0105456 to Lin discloses a method of treating age-related macular degeneration. Lin makes no mention of the use of a photosensitizer, and uses wavelengths in the range of 0.5 to 3.2 microns, overlapping the ranges claimed by applicant. Because applicant has given such a criticality to the specific, very narrow range of wavelengths used, it is the examiner's position that it would not have been obvious for one of ordinary skill in the art to choose wavelengths of 1.26 μm to 1.27 μm from the much broader wavelengths of 0.5 to 3.2 microns disclosed by Lin. Lin does not disclose any need or desire for generating singlet oxygen, therefore choosing the wavelengths 1.26 μm to 1.27 μm disclosed by applicant as responsible for the direct generation of singlet oxygen would not have been obvious.
6. US 2004/0162549 to Altshuler discloses the direct generation of singlet oxygen with wavelengths in the range of 1260 to 1280 nm (Table 1). Altshuler is directed towards a dermatological device and makes no mention of treating macular

degeneration. In fact, Altshuler teaches away from treating the eye of a patient with this light radiation by providing a shield to block dangerous radiation from entering the eye. Therefore, it is the examiner's position that one of ordinary skill in the art would not choose the wavelengths disclosed by Altshuler to treat macular degeneration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LYNSEY CRANDALL whose telephone number is (571)270-7035. The examiner can normally be reached on Monday to Thursday 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hank Johnson can be reached on (571)272-4768. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
